

Wireless Broadband anytime & anywhere

Azalea Networks adds Leapa Limited as Value-Added Reseller in Hong Kong & Macau

Wireless mesh network routing solutions provider expands its global reseller network

Milpitas, California – November 11, 2008 – Azalea Networks, a leading innovator in wireless network equipment and technology, today announced an agreement with Leapa Limited of Hong Kong. Leapa is a provider of next-generation networking products and solutions for industrial enterprises and municipal applications. The relationship further extends Azalea’s international reseller efforts throughout Asia.

“At Leapa, we select only the best-of-breed products to help our clients make the most of today’s wireless technology,” said Robert Lo, director and CEO of Leapa. “Azalea’s patented wireless routing solution allows us to provide the benefits of high-throughput voice, video, and data with lowest cost of ownership,” he added.

Azalea’s technology provides municipalities, public safety applications, oil and gas operations, shipping ports, distribution centers, and business and education campuses with the benefits of turn-key wireless solutions. Azalea’s technology offers the ability to expand, grow or modify a network as needs change. The “intelligent” characteristics of Azalea’s network routing technology are inherent in its ability to deliver peer-to-peer routing across the entire network while enabling network management from the host to the client. Azalea’s solution also enhances its wireless network’s integration with other wireless and wired networks, including the Internet, enterprise networks, or service provider infrastructure, adding flexibility for the wireless network operator.

“Azalea will support Leapa’s efforts to offer innovative wireless broadband solutions, from cargo terminals to corporate campuses to hotels, by providing products, expertise, and support to meet today’s high-throughput, reliability, and scalability requirements,” reported Rake Jiang, Azalea vice president and general manager, International Markets and Global Strategic Alliances.

About Azalea Networks

Azalea Networks, headquartered in Silicon Valley, California, (www.azaleanet.com) is the first company to provide network intelligence to its broadband wireless mesh infrastructure through an innovative wireless routing technology that sets new standards in price and performance. Azalea's solution is ideal for service providers, government agencies, and industrial enterprises that need the superior high performance, scalable capacity, quality of service, seamless mobility and other advantages made possible by true, intelligent network routing.

About Leapa Limited

Leapa Limited is a Hong Kong based value-added distributor and IT consultancy, (www.leapa.net) dedicated to providing leading-edge wireless solutions to markets in Hong Kong, Macau and the PRC. Leapa operates under the belief that ubiquitous computing is essential for enterprises to reach the next level of productivity and specializes in wireless networking for hospitality, intelligent transportation, logistics and wide-area industrial applications.
