

Wireless Broadband anytime & anywhere

Azalea Networks Partners with Northern Video Systems to Distribute its Advanced Wireless Routers

MILPITAS, CA – January 22, 2008 – Azalea Networks, a leading innovator in wireless mesh broadband equipment and technology, today announced that it has signed a distribution agreement with Northern Video Systems, a leading distributor of security, surveillance and IP video equipment, to distribute Azalea products to systems integrators and dealers throughout North America.

Through the agreement, Northern Video will offer wireless mesh systems from Azalea Networks that provide advanced routing capability specifically designed for wireless environments. Northern Video will distribute Azalea Networks' products through its headquarters in Rocklin, California, and its Texas and New Jersey locations. "We are excited to represent Azalea Networks since its products offer superior system performance in a Layer-3 networking environment," said Brian James, vice president of Northern Video. "This kind of solution will appeal to industrial enterprise customers and wireless operators who seek a solution for overcoming challenges they may have faced with wireless technology in the past," James added.

Azalea Networks' patent-pending system of delivering video over a wireless network sets it apart in the wireless mesh network industry. Its products deliver video, voice and data with extremely high quality and speed. Azalea's particular ability to deliver mobile video over broadband is now considered the gold standard in the wireless mesh network industry.

"By joining forces with Northern Video, Azalea Networks is able to bring its high-performing networking solutions to a larger group of system integrators and dealers," said John Elms, CEO of Azalea Networks. Elms reported, "We're providing unprecedented throughput to the video security market, enabling both high level security facilities such as power plants, airports and manufacturing facilities, as well as industrial, education, government and commercial facilities, to deploy reliable, high-quality video security solutions in the most challenging environments."

About Azalea Networks

Azalea Networks (www.azaleanet.com), headquartered in Milpitas, California, and Beijing, China is a leading provider of wireless mesh broadband systems and solutions. Delivering the highest performance and industry leading scalability and support, Azalea is the number one mesh solution provider in China and among the fastest growing mesh providers in the global market.

About Northern Video Systems

Since 1986, Northern Video Systems (www.northernvideo.com) has been a leading distributor of professional video, security and surveillance equipment. The company has built a foundation for sales, customer service and value added systems integration that is second to none in the high volume distribution market. As one of the fastest growing security providers in the country, Northern Video prides itself on its extreme commitment to the customer and its ability to deliver additional services such as system design and integration.
