

Wireless Broadband anytime & anywhere

Azalea Networks Expands Globally with Distributor Satinlink International

***Innovative wireless mesh network routing technology now
available in Africa, South America, Southern Europe, and the Middle East***

Milpitas, California – January 7, 2009 – Azalea Networks, a leading innovator in wireless network equipment and technology, today announced an agreement with Satinlink International of South Africa. Satinlink will be the first company in Africa to offer Azalea’s patented “intelligent” routing technology that delivers on the promise of wireless voice, video, and data with superior performance and lowest cost of ownership.

Satinlink specializes in consulting and the distribution and installation of wireless mesh networks. “We are pleased to provide the world’s only Layer-3 wireless mesh routing technology as part of our solution,” commented Paul Edwards, Satinlink CEO. “Of particular importance is Azalea’s expertise in video surveillance and its superior ability to provide jitter-free, reliable video wirelessly even over multiple hops over long distances,” he added.

Azalea’s technology is unlike any other in the marketplace, providing municipalities, public safety applications, oil and gas operations, shipping ports, distribution centers, and business and education campuses with the benefits of turnkey wireless solutions. Azalea’s technology offers the ability to expand, grow or modify a network as needs change. The “intelligent” characteristics of Azalea’s network routing technology lie in its ability to deliver peer-to-peer routing across the entire network while enabling network management from the host to the client. Azalea’s solution also enhances its wireless network’s integration with other wireless and wired networks, including the Internet, enterprise networks, or service provider infrastructure, adding flexibility for the wireless network operator.

“Azalea is excited about the expertise that Satinlink brings to our initiative to expand Azalea’s reach throughout the world,” said Rake Jiang, Azalea vice president and general manager, International Markets and Global Strategic Alliances. “Now Africa, South America, Southern Europe, and the Middle East will have access to the high throughput and superior performance offered by Azalea’s unique wireless solution,” he added.

Satinlink is the most recent distributor to join Azalea's international Mesh360 Partner Program which also includes WAV, Inc. and Northern Video Systems in North America, CEC CoreCast in China, and OlenCom in Russia and Central Asia.
